Maastricht Data Repository, a practical approach to FAIR data management.

By Dr. Tim Lustberg, Data engineer at Maastricht University's DataHub

FAIR data management can be an overly complicated technical affair when trying to go from unmanaged research data to applying all the FAIR Principles at once. Maastricht Data Repository offers solutions to take that first step into FAIR data management by providing some simple FAIRification services that touch all aspects of being FAIR. In my lecture, I will zoom in on these services and why they are an important first step in the FAIR journey.
