FAIR Legal Network Analysis Research Software? Experiences & Challenges

By Prof. Gijs van Dijck, director of the Maastricht Law and Tech Lab, Principal Investigator at the Brightlands Institute for Smart Society (BISS), and researcher at M-EPLI at Maastricht University

This presentation will explore the experiences of using FAIR (Findable, Accessible, Interoperable, and Reusable) research software for legal network analysis. The presentation will cover the challenges of implementing FAIR principles in the development of research software and the benefits of using FAIR-compliant software in legal network analysis.
