### Pandemic Science, Open Science and Research Quality

By Dr. Gowri Gopalakrishna, Assistant Professor at the Department of Epidemiology and member of the Platform for Research Ethics & Integrity at Maastricht University and Senior Research Fellow at Amsterdam University Medical Center

Gowri is an epidemiologist by training who has had various roles as an epidemiologist in big pharma, NGO and government in Asia and Europe before commencing her PhD in 2011. She has been involved in the control and prevention of the SARS epidemic of 2003/04 in Singapore and later, was one of the contributing voices in The Netherlands on the Covid-19 pandemic providing review and critique to the national prevention and control measures of The Netherlands as well as on the quality of Covid-19 research being produced. In this talk she will share some insights on the Covid 19 crisis and how it impacted open science and research quality.
