Making the Netherlands Cancer Registry more FAIR

By Dr. Peter Prinsen, Head of Clinical Data Science at the IKNL (Netherlands Comprehensive Cancer Organisation)

The Netherlands Comprehensive Cancer Organisation (IKNL) manages the Netherlands Cancer Registry (NCR). The main goal of the IKNL is to reduce the impact of cancer, from the personal to the societal level. With the NCR as its core activity, IKNL enables health care professionals, researchers, policy makers and others to reflect on cancer and on palliative care. In the past years, the IKNL has worked on making the NCR more FAIR. In this presentation, Peter Prinsen will talk about why IKNL is doing that, what they have done so far, what the challenges are, and what they are planning to do in the future.
